Marshal Forey's speech, asking that more men and money shall be sent to Mexico, while the Emperor said on Jan. 29 that the troops were coming home, is too manifestly in contradiction with the discourse from the throne for it to be presumable that a Marshal of France would have spoken that way without the Emperor's license. It signifies little that Rouher, speaking from the bench of talking ministers, said Forey had only expressed his personal opinions, and that the true views of the French Government were to be found in the Imperial words alone.
